

Dear Parents/Carers,

As part of the Year 6 Science Programme of Study, the children are learning about the Circulatory System.

In order to provide practical activities, which stimulate our learners, on **Friday 7<sup>th</sup> May 2021**, we will be dissecting Lamb's hearts.

The aim of this session is to observe and record what we see. We will also apply our knowledge of what has been learnt so far to discuss points such as, comparing the 3 types of blood vessels. As a result, the children will find this session extremely beneficial and will gain a greater depth of understanding of the organ and how it functions.

We understand, however, that there may be some children who do not feel comfortable with this, and so we will ensure that only children, who want to take part in the activity, do so. Please rest assured, that we will take all of the necessary safety precautions required, such as purchasing hearts of food quality and making sure that the children wash their hands thoroughly after the activity.

If you have any concerns regarding this activity or would like to opt your child out of it, then please do not hesitate to contact your child's teacher before **Friday 7<sup>th</sup> May**.

The contact details are:
