Friday 27th May 2022

This week in Maths we have revisited our learning on positional and directional language. We have also been celebrating the Queens Platinum Jubilee through various activities. The children learned about the history of Queen Elizabeth II and the important role that she has. We then plotted a timeline of significant events that occurred during her reign. In preparation for our Jubilee garden party, we made and sent party invitations, created crowns and our very own bunting.

After half term we shall be consolidating our place value knowledge up to 100. During the afternoons, we shall be continuing to look at botanical art and the artwork of Arthur Harry Church. In Science we will be continuing to learn about plants, identifying the difference between flowers and wildflowers. In History we shall continue our project all about how toys had changed within living memory. In Music we will begin our new unit, 'Reflect, Rewind and Replay.' In P.S.H.E. we will begin our new unit, 'Changing Me,' where will learn about life cycles.

The Phonics Screening check for all Year 1 children will commence the week beginning 6th June. Please ensure you utilise the resources Mrs Azzopardi sent out last week in preparation.

Reminder – please send your payments for our trip to Weston Park via Parent Pay by the 6th June 2022.

Please ensure you read with your child at least 3 times per week. Your child's Phonics teacher will change books on a Friday. To support with this please ensure reading books are in school on a Friday.

Have a lovely half term, we look forward to seeing you all on the 7Th June. ☺
