Friday 10th June 2022

This week in Maths we have revisited our learning on place value. We have practiced counting forwards and backwards to 100. In Science we have identified the different parts of a tree, before recognising different types of trees and sorting them into evergreen and deciduous. In Music we began our new unit, 'Reflect, Rewind and Replay.' In P.S.H.E. we began our new unit, 'Changing Me,' where we learnt about the lifecycle of animals and humans, before beginning to think about how people change.

Next week we shall be continuing our learning on place value. We will partition numbers, identify the value, comparing numbers and order numbers up to 100. Science we will investigate the weight of different seeds. In History, we shall be handling toys from the past, identifying what materials they were made from and enquiring as to how they could have been played with. In Art we will be continuing our study on botanical artists, creating observational art work based on Arthur Harry Church's techniques.

For your homework this week we would like you to consolidate your place value knowledge using the game below:

https://www.topmarks.co.uk/learning-to-count/place-value-basketball

We would also like you to talk a walk to consolidate your Science learning. Can you identify the name of trees you can see? As a challenge, could you create a tally chart of how many different trees you spot?

Reminder – our trip to Weston Park is on Monday 13th June. Please ensure your child is wearing appropriate outdoor clothing and footwear. With the possibility that the weather will be warm and sunny, please ensure your child has a water bottle and is wearing a sunhat and sun cream. They are able to bring their own sun cream for them to apply themselves and keep in their own bag.

Have a lovely weekend. ☺
