Year 5 10/06/2022

This week in English we have been looking at biographies and how we organise our writing. We have been developing paragraph construction using cohesive devices, which has helped us to make our text read fluently.

In maths, we looked at converting between different measuring units within length, weight and volume. We then used this knowledge to answer problem solving and reasoning questions.

On Wednesday, as part of our geography topic we enjoyed an online tutorial about the River Severn by the Severn Rivers Trust. The children really enjoyed the session and impressed the presenter with the quality of questions they asked her.

Stay save and have an excellent weekend,

Miss Russell / Mr Baker
