Year 5 01/07/2022

This week we have been testing our Mathematical skills and we used strategies to help us solve arithmetic and reasoning questions using mental and formal methods. In reading, we used our comprehension skills to retrieve answers from a text and our inference skills to help deduce what is happening in the text with reference to feelings and thoughts of characters and situations.

We continued to learn about rivers and how rivers can be dangerous i.e. floods. We then completed a flow chart to explain the stages that happens to the surrounding area of the river when it floods.

On Friday, we had a visitor from the local library to introduce the summer reading challenge. This is an exciting opportunity for all our children and will count towards the children's University Passport Programme.

On another exciting note, Year 5 will be visiting Abraham Darby for a science afternoon on the Monday 11th July 2022 to participate in a science lesson led by the pupils and staff of the school. This again is an amazing opportunity for our children to experience a next level science investigation.

Stay safe and have an excellent weekend,

Miss Russell / Mr Baker
