Year 5 08/07/2022

This week we have been learning how to find amounts of numbers, multiplying a fraction by an integer and had a logic puzzle day. We used our mathematical skills and strategies to help us solve these arithmetic, reasoning and puzzle questions.

We continued to learn about rivers and how rivers get polluted by chemicals, fertilizers, pesticides and people throwing their rubbish into the river. We found out that these actions pollute the river killing animals and plants.

Remember that Year 5 will be visiting Abraham Darby for a science afternoon on the Monday 11th July 2022 to participate in a science lesson led by the pupils and staff of the school.

Stay safe and have an excellent weekend,

Miss Russell / Mr Baker
