Year 5 15/07/2022

This week we have been learning how to find place value, multiples and factors of numbers and identifying prime numbers. We used our mathematical skills and strategies to help us solve arithmetic and reasoning problems.

We continued to learn about rivers and how rivers get polluted by chemicals, fertilizers, pesticides and people throwing their rubbish into the river. We found out that these actions pollute the river killing animals and plants and we then completed a post assessment of what we had learned.

Year 5 visited Abraham Darby for a science afternoon on the Monday We had an excellent day and all the children enjoyed analysing dragon's blood! What a great investigation.

Remember, Year 5 are going to the cinema on Monday 18th July 2022 to watch The Railway Children.

All children are to wear school uniform and do not have to bring their PE kit on Monday.

Stay safe and have an excellent weekend,

Miss Russell / Mr Baker
