Friday 16th September 2022

This week in Maths this week we have been covering Place Value. During these lessons Year 1 children have been counting forwards and backwards from 10. Year 2 children have been recognising tens and ones in 2-digit numbers. All children have been introduced to their new History topic 'The Victorians' by looking at a variety of objects/artefacts from the Victorian times. This generated a lot of excitement and discussion from the children.

This term our Science topic is called 'Materials'. So far, we have looked at range of different objects from around the classroom and talked about what they were made of. We then sorted objects into different groups based on the materials they are made of.

All children will have been sent home a plastic wallet to keep their homework in.

Spellings will be sent home on the Monday for them to practise ready for a spelling test on the following Monday. Due to the extra bank holiday the spelling test will take place on Tuesday. Maths homework will also be sent on a Monday for children to complete and then returned the following Monday.

Please ensure you read with your child at least 3 times per week. Your child's Phonics teacher will change books on a Friday. To support with this please ensure reading books are in school everyday.

Reminder – Please ensure names are in cardigans and jumpers.

Have a lovely weekend! 😊
