Our week in Year 1 and 2 – 30.09.22

This week we have worked extremely hard in school. In Maths Year 1 and 2 have been ordering objects and numbers. They have been using number lines to help them find numbers that are greater than and less than given numbers.

In history this week we have been learning about the monarchy. We talked about who our King is and what their role is.

In Science, we have started an investigation to see which materials would be the best to make everyday objects such as spoons. We thought about each material's properties to help us decide.

All the children enjoyed their clubs this week and were excited to take part.

In art club this week, we have been making our own collage hedgehogs.

"Look at our fantastic work!"
