Year 4

This week Year 4 have been working on describing Medusa's cave from Ancient Greek Mythology. They have used excellent vocabulary in their descriptions, including the use of adjectives and expanded noun phrases.

In maths we have been working very hard on place value and comparing numbers up to 4 digits.

The children have also started to hone in on their balancing skills in PE, which will lead to creating a gymnastic routine.

They have begun to explore sound in science, gaining knowledge on how sound is created, what affects it, how it travels and how we hear by undertaking exciting investigations.

Have a lovely weekend

Miss Brotherton/ MR Baker
