

Our Week in Year 3 – 23.09.2022

Year 3 have demonstrated resilience within all their learning this week and should be extremely proud of themselves. In Maths we have continued learning about the Place Value of 3-digit numbers up to 1,000.

Children in my English group have written their first narrative – writing their own story inspired by 'Stone Age Boy,' written by Satoshi Kitamura. They demonstrated a creative flare and proved to be authors in the making!

In History the children discovered what homes would have been like in the Palaeolithic, Mesolithic and Neolithic period. We then compared them, discussing why and how homes developed over the Stone Age period. In Science, we worked in groups to investigate the different properties of rocks. We identified similarities and differences between rocks, using scientific vocabulary to support our explanations.

This week the children have been visited by the Eatwell Team. They taught them all about what is sugar is, how it impacts on our health and the maximum recommended daily amounts of added or free sugar. We used the 'change 4 Life Food Scanner' app to explore how much sugar is in our food.

In addition to this, during lunchtimes the children have welcomed our new Sports Coach. All children have engaged in these sessions which has been wonderful to see! These sessions will be on offer Monday – Thursdays.

Have a lovely weekend and we look forward to seeing you next week,

Mrs Smith and Miss Beddows
