Our Week in Year 3 – 21.10.2022

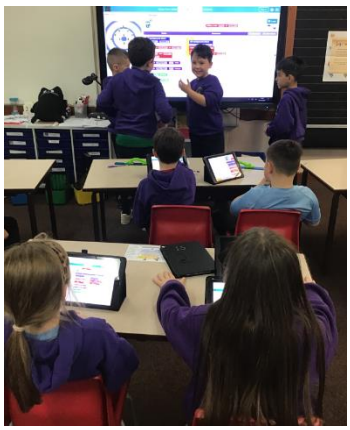

This week Year 3 have had a wonderful end to a very busy half term. Children in my English group this week have focused on writing an explanation all about fossils. The children started to think about how to group information together to link sentences, forming a paragraph. They then created subheadings. Afterwards they explained what fossils are and how they are formed – illustrating through their own diagrams of the process.

In Science, Year 3 have concluded their topic all about rocks and fossils. They observed dinosaur skeletons and formed hypotheses as to their characteristics and physical attributes and what this could tell us. They then classified them based upon their hypotheses.

In computing the children continued to create simple programs and debug them. They explored simple code blocks to control the behaviour of a sprite onscreen. The blocks they used controlled what appeared onscreen and they used a key press to begin the next algorithm. We also have our very own group of computing technicians who modelled each step and supported other children through the learning!

In R.E. we reflected on the meaning of charity. We discussed what being charitable entails and when the children have demonstrated this. The children then thought about what charities they know of and how they help others when they are in need. We discussed the Islamic story of Sunan Ibn Majah, Chapter 18: The Chapters on Charity. The children sensitively discussed how other religions also believe in caring for others through being charitable.

The children have so much to be proud of this half term! We hope you have a lovely and restful half term. We look forward to seeing you again next half term.
