Our Week in Year 3 – 07.10.2022

Thank you to all of the parents who attended our Shared Reading drop in on Monday. It was wonderful to see so many families engaged and developing a love of literature. The children enjoyed sharing their stories.

Children in my English group this week have focused on writing their own newspaper reports about the discovery of a woolly mammoth!

In History, Year 3 have been finding out about how we know about prehistory and the role of archaeologists. We found out about different archaeological discoveries of the Stone Age and presented our findings to the class. We then plotted these on a map, identifying the locations that the discoveries were made.

In Science, Year 3 have been learning about the different types of rocks. We then found out how metamorphic, igneous and sedimentary rocks were formed.

In R.E. we reflected on Jesus' parable of 'The Good Samaritan.' The children sensitively thought about who showed care and what they would have done.

In Art the children compared the art work of artists Laura Mc Kendry and Edgar Degas. They then created their own mood board and applied the techniques modelled.

In P.E. the children have applied their skills we have been developing over the past few weeks and have played their first netball matches.

Dates to note in your diary and look forward to –

Year 3 shall be visiting St. Michaels Church on **Wednesday 12th October 2022** to attend Experience Harvest.

Have a lovely weekend and we look forward to seeing you next week,

Mrs Smith and Miss Beddows
