Year 4

This week, Year 4 have continued learning about biographies, recapping with what is a biography is and the features of this type of text. We are looking at Roman Emperors Julius Caesar, Claudius and Constantine and have begun to collect information to help us write a biography about these great Roman leaders.

In maths, we have been working on our multiplication and division skills and have been learning how and when to use these in answering questions and solving problems using different method..

Multiplication National Assessment

Remember to practice your times tables using the link below. The more you practice the better you will become.

https://mathsframe.co.uk/en/resources/resource/477/Multiplication-Tables-Check

In science, this week we have continued to learn about 'States of matter'. We looked at changes of state from a solid to a liquid and back again using three different types of chocolate (milk, dark and white). We predicted which chocolate would return to a solid state the quickest and reasoned why this was. In addition, we used thermometers to measure the temperature every minute to use as part of our investigation. With this information we started to record the experiment using a formal method.

Residential Visit: ARTHOG

There will be a letter sent out today with information about the trip. Also, there will be meeting held this Tuesday 14th February at 6pm. This will give you information about the trip and also to collect the forms needed to be completed.

Have a lovely weekend

Miss Brotherton/ Mr Baker
