Year 4

This week, Year 4 have started to learn about explanation texts, what they are and what type of features this text has, such as subtitles, facts paragraphs and specific vocabulary.

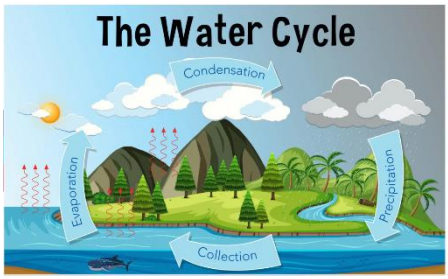

In maths, we have been working on finding the perimeter of shapes using non-unit and unit measurement. We moved on to find the perimeter of rectilinear shapes using are adding skills to help solve our problems.

Multiplication National Assessment

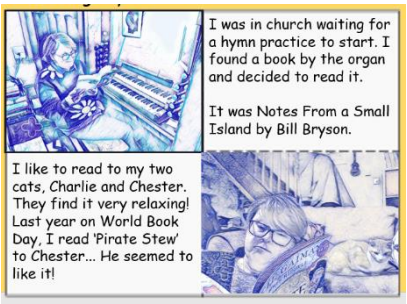

Remember to practice your times tables using the link below. The more you practice the better you will become.

https://mathsframe.co.uk/en/resources/resource/477/Multiplication-Tables-Check

In science, this week we have continued to learn about 'States of matter' and looked at the water cycle and how states of the water change due to evaporation, condensation and precipitation.

We then drew a water cycle diagram and recorded on how each phase the water changed its state.

On Thursday it was World Book Day. The children carried out numerous activities throughout the day to celebrate reading. One activity was to draw and write an explanation of where the best or strangest place they had read and who they would read to at home.

Swimming: Please remember to pack a set of pyjamas or light clothing as detailed in the letter sent home for Tuesday's swimming assessment activity.

Residential Visit: ARTHOG

At the moment, the Arthog preparations are in full swing. More information and requests will follow so please keep an eye out for them.

Have a lovely weekend.

Miss Brotherton/ Mr Baker
