Year 3 Snow Day Work

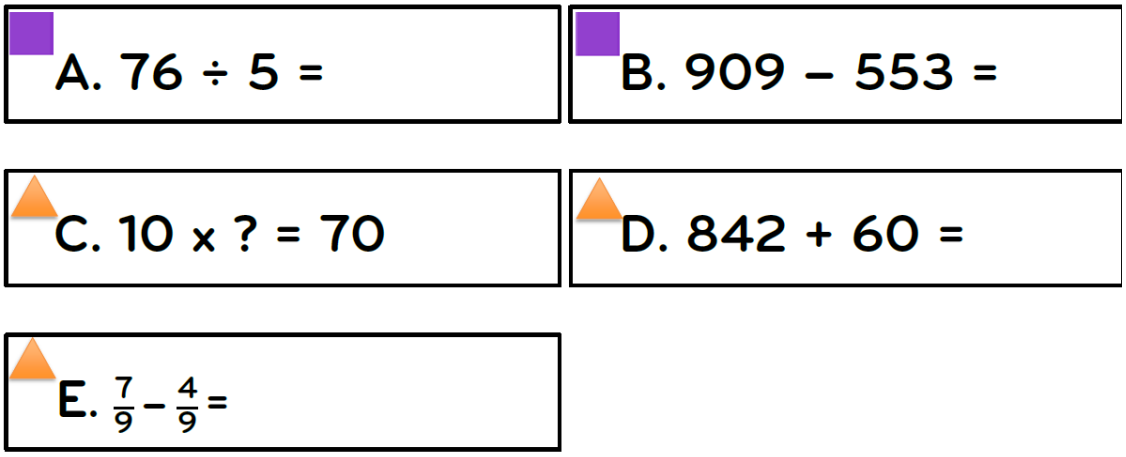

Friday 10th March 2023

Maths:

Fluent in Five - answers on page 2!

To continue our work with measures please use the snow to find out the following:

1. How deep is the snow at 4 different points? Write them in cm and then covert to mm.
2. How much does a cup of snow weigh? Write this in grams.
3. How many ml of water is a cup of snow equal to once it has melted?

English:

Using your knowledge of newspaper reports, write a short report on the snow in Madeley. You may use the internet to help you but remember to stay safe when online. Think about:

- When – when did it start to fall? When did it stop?
- Where – where has it snowed? Where has the cold weather come from?
- Who – who has been affected?
- What – what has happened? What is the impact? What are people doing to help themselves stay safe?
- Why – why have we got the snow? Why is it making it hard for people to travel and get to/from work or school?

Reading:

Mrs Beddows and Mrs Moore's groups – Mrs Smith has uploaded your videos already onto the website. Perhaps you could write some sentences about the snow using your sounds.

Miss Russell's group – read your own book or a text of your choice. Pick out some interesting words or words you are unsure of. You could begin to make your own dictionary of words you have collected. Remember a dictionary also includes their word class (noun, verb, adjective, adverb) and a short definition.
