

Year 4

This week, Year 4 have continued looking at persuasive texts, in particular adverts and leaflets. We have been gathering information and planning to write a leaflet about the beautiful basilica called La Sagrada Familia in Barcelona to persuade people why they should visit this splendid place. We used features of this type of texts and included adjectives, connectives and persuasive vocabulary.

In maths, we continued to look at decimals as tenths and now hundredths by using visual models, fractions and decimal formats, where we compared and transposed between each format and then used this information to divide two digit numbers by 10 and 100. We have also been practicing our Multiplication National Assessment.

Multiplication National Assessment

The time has come and as mentioned in the letter sent out this week, we are undertaking the assessment next week from Monday so it's the last weekend to practice your times tables using the link below. REMEMBER, the more you practice the better you will become!

I have now included a new website, which is a fun interactive game. Have a go with your friends and family.

https://www.transum.org/Software/SW/Flash_Tables/

In science this week, we started a new topic, which is understanding classification. We have introduced the topic by learning what this means and about a very famous botanist and zoologist Carl Linnaeus, who changed how we group animals and plants.

Have a lovely weekend.

Miss Brotherton/ Mr Baker
