Year 4

This week, Year 4 have continued looking at persuasive texts, in particular adverts and leaflets. We have been writing a leaflet about the magnificent basilica called La Sagarda Familia in Barcelona and persuading people that they should visit this wonderful place. We used features of this type of texts and included adjectives, connectives and persuasive vocabulary.

In maths, we continued to look at decimals as tenths and how these make up a whole number. We have continued to practice our Multiplication National Assessment and have finally completed all assessments. This is a government driven assessment and the results will be available later on in the year.

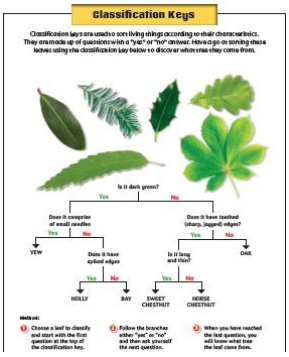

Multiplication National Assessment

Although we have completed this year's assessment, we think it is a good idea not to rest on our laurels and continue to practice our times table, so we will keep these links in.

REMEMBER, the more you practice the better you will become!

In science this week, we continued our started a new topic about understanding classification. We recapped what we know about the very famous botanist and zoologist Carl Linnaeus, and as you remember, changed how we group animals and plants. We then started to learn about Classification Keys and how we used them to identify different animals and plants.

Have a lovely weekend.

Miss Brotherton/ Mr Baker
