Year 4

This week Year 4, we planned and had have written a Non-Chronological Report independently using all of the features this type of text has. We used the facts we researched about the Amazon rainforest and use adjectives, expanded noun phrases, personification and commas in a list in our text.

In maths, we looked at measurement and in this case money. We identified, converted and compared different monitory values and solving problems.

Multiplication National Assessment

Follow the links below to practice your times table, so we will keep these links in.

REMEMBER, the more you practice the better you will become!

In science this week, we continued the topic about understanding classification. We recapped the last few week's lessons about classifying and moved on to classifying animals into their distinct groups such as mammals, fish, reptiles, birds and amphibians. We then learned about annelids, arachnids, molluscs, insects and crustaceans and then sorted animal into their groups and completed the lesson with a WHO AM I? quiz.

Have a lovely weekend.

Miss Brotherton/ Mr Baker
